About QuantPro

Company Brief

QuantPro Analytics is a Big Data, Machine Learning, Dashboard and Automation consulting and training firm based in Johannesburg. The company helps firms to transition into Big Data-enabled and machine learning-powered business systems. It provides services that promote big data analytics, automation and real-time performance monitoring and reporting for improved insights-based organizational decisions.

'Our Vision.

Our vision is to help in transforming South African industry, and everywhere else where we exist, into a Data Science, Machine Learning, and Automation-powered economy.

'Our Mission.

Our mission is to empower every organization and individual person in the South African economy with the tools and skills-of-the-future. We endeavour to deliver the best consulting and training services at affordable rates. We pride ourselves on the efficiency and quality of our service.

02 | Our Services

Consulting & Research in BDA, ML, Dashboards & Automation

We help firms to transition into Big Data-enabled and machine learning-powered business systems towards promoting real-time performance monitoring and reporting, and business process automation. We provide system configurations, upgrades, testing, maintenance, and staff orientation support services. We also help to improve the capabilities of the firm's existing systems by integrating with powerful capability-enhancing applications. We can be your partner to provide big data analytical support, dashboard construction, and automation. Our consulting services also extend to Big Data, Machine Learning, and Automation related industry research in various industries in fields such as marketing analytics, opinion mining, sentiment analysis, automated processes, visualization, social media analytics, and machine learning.

Training in BDA, ML, Dashboards & Automation

We offer training to managers, professionals, and staff teams in various fields on vital skills which they may require to be able to efficiently and effectively deal with Big Data and Automations to invoke the power of analytics at different levels in an organization – from the executive down to deep operational analytics. We help firms to unlock the power in real-time monitoring and reporting. It has been widely practically evidenced that Big Data Analytics prompts organizational leaders to obtain valuable insights from their company's wealth of data which can help them make improved and timely decisions that enhance the operational efficiency of their businesses.

In our training and consulting work, we work with various platforms and tools including Python, SAP, Hadoop, Spark, Databricks, Azure, QGIS, Tableau and Excel. We offer customizable training and consulting services at affordable rates to help small-to-medium business community in South Africa to harness the power of Big Data, Machine Learning, Dashboards and Automation tools. Our expert trainers provide the training in a step-by-step manner such that even individuals lacking strong computer science background may also be able to find comfort in the training and understand the concepts smoothly.

03

Key Partners

One of our main priorities is to build a strong network of very distinguished partners. Quantpro Analytics has established sound working partnerships with some regional partners with different product portfolios that empower the business to provide the best services that fit the business's customers' varied requirements.
