About Us

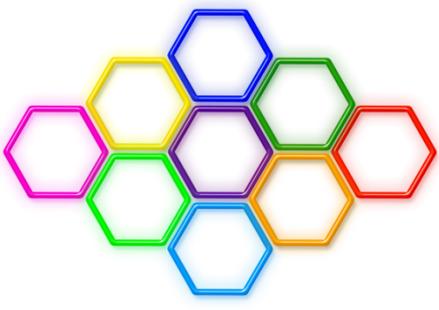

QuantPro Analytics is a Johannesburg-based black-owned Big Data Analytics consulting firm, founded in the year 2018. The prime idea behind the business is to help African small-to-medium enterprises (SME) to improve in terms of operational efficiency by harnessing the power of Big Data Analytics, Machine Learning, Dashboards, and Automation tools. The intended end result is to enable the SMEs to improve on data-driven decisions through real-time performance monitoring and real-time reporting.

Harness the tools that effectively tackle the four Vs of Big Data... !

Dashboards & Automation:

- ▀ Tableau, Power BI, PyDash, Selenium, HANA

Databases:

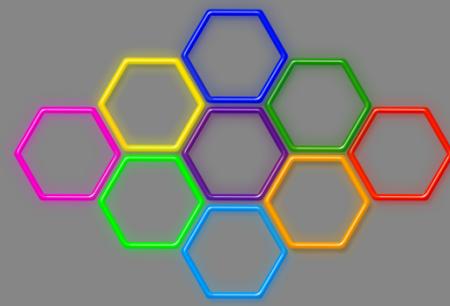

- ▀ SQL Server & SAP HANA

Spreadsheets:

- ▀ MS Excel & Google Sheets

HISTORY, GROWTH & DEVELOPMENT

HISTORY

QuantPro Analytics was founded in the year 2018. At the point of its inception, the company's service portfolio only included Data Analytics and Dashboards consulting and training services. The project was first piloted from the founder's house. Upon receiving encouraging interest for the services from the industry, the owner saw the need for setting up a more formal facility.

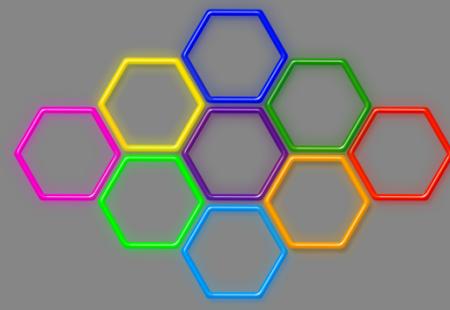

GROWTH & DEVELOPMENT

Although at the beginning the company realised compromised growth due to COVID 19 impact and the economic climate, the demand for the company's services has tasted a reasonable increase with sales approximately doubling. As of mid-2021, the company began putting to life its long-term plan of establishing a centre for coding and data science in South Africa.

PARTNERS & AFFILIATES

One of our main priorities is to build a network of distinguished partners. Below is the list of some of our partners and affiliates in big data analytics, automation, artificial intelligence and visualization :

TESTIMONIALS FROM SOME OF OUR CLIENTS

Thanks to QuantPro Analytics, we now have a real-time view into the major metrics that drive our growth, and no longer have to wait days or weeks to chug through the data in spreadsheets.

Rufaro Mafinyani, Intellica, Sandton

QuantPro Analytics gives us incredible insights into our monthly numbers and growth, and provides us with invaluable information that allows us to improve our business in ways that weren't possible for us before.

Jacqueline Mdakane, Wave Engineering, Roodeport

As a founder, there are a million things that need my attention every day. QuantPro Analytics provides automated dashboard with key insights about our business without doing any calculations or pulling data into spreadsheets. It's been an invaluable service!

Patrick Nyika, Delta Hedge, Sandton

QuantPro provides a powerful training on Big Data Analytics in a step-by-step manner such that even a novice learner in Data Science can easily follow. This training was massive and just got me to a perfect start into my Data Science journey.

Moilwa Mokoetsane, Pretoria

Coding in python towards 4IR projects has always been on my heart but did not know where to start. Thanks to QuantPro for beautifully unpacking 11 libraries in python for Data Science and Automation.

Vincent Shange, Idada Consulting, South Africa

QuantPro Analytics provided us with tools giving us a snapshot of what is going on in the business and let us do deep analysis to see trends over time, completely replacing our error-prone spreadsheets.

Sibusiso Shezi, SETH Holdings, Durban
